D. Board Considerations - None

E. Matters of Special Privilege

F. Adjournment

MEMORANDUM

Date: June 10, 2015
To: The Wetlands Board
From: Michael D. Woolson, Senior Watershed Planner 
Subject: W-11-15
4101 South Riverside Drive, additional information

Mrs. Deborah Linkenauer submitted the additional information requested by the Wetland Boards at the May 13, 2015 meeting. She clarified that the new bulkhead will be two feet in front of the existing bulkhead, with the existing bulkhead to remain in place. The new bulkhead will tie into the existing bulkhead near the cypress tree. There will be filter fabric and clean backfill placed between the new and existing bulkheads. There are now approximately 14 sq ft of non-vegetated wetlands and 118 sq ft of subaqueous bottom that will be impacted with this project. Staff recommends approval of the application with the previous conditions as outlined in the May 13, 2015 staff report.
